

Working from home – what you need to know

Kensington help your employees work like pros, wherever they are.

Working from home is now **business as usual.**

54%

of employees will change jobs for greater flexibility...¹

83%

...and 83% feel they don't need an office to be productive.²

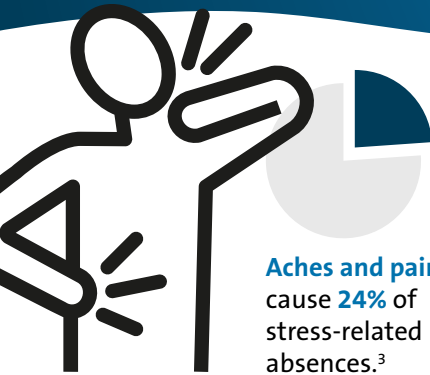

Wellbeing

Productivity

Data Security

Home workers need the right tools to stay productive.

2 MILLION WORKERS

a year suffer RSI injuries...⁴

71% of workers say their chair has caused them back pain.⁵

However, this could be prevented with a backrest, footrest and seat cushion

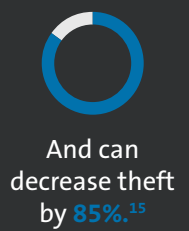

...And a 2nd screen can provide a 40%+ productivity increase over just a laptop.⁹

...while 1 average data breach costs **£2.89M** to resolve.¹²

Don't neglect physical security...

1 in 10 laptops are stolen in their lifetimes.¹³

In >90% of screen exposures, confidential data is accessed.¹⁴

What about businesses with workplace wellness programs?

28% fewer sick days.⁶

And **91%** of workers say they feel motivated to do their best.⁷

Organisations with effective health and productivity programs report:

11% higher revenue per employee

1.8 fewer days absent per employee per year

28% greater shareholder returns¹⁰

Kensington also provides extra layers of protection...

Biometric fingerprint keys for multi-factor authentication

Secure and convenient passwordless authentication

Kensington take care of your remote workers' health and comfort through:

- ✓ Monitor arms, stands and laptop risers to reduce eye and neck strain
- ✓ Footrests, backrests and wrist supports for total-body support
- ✓ Ergonomic mice and keyboards to reduce RSIs
